PROFILE

I am a reliable software engineer that does not shy away from a challenge. I have excellent interpersonal skills and can collaborate well with other members of a team, both taking and giving direction.
I enjoy programming, but I am truly passionate about delivering on expectations.

WORK EXPERIENCE

Krypton Signs
Database and back-end developer (February 2023 - March 2024)
Designed a database and code-behind to support both a web application and desktop application that are expected to receive hundreds of requests for custom signage, providing a significant increase in website traffic and sales.
